program, the [Climate Action Incentive Fund \(CAIF\)](#) to support Small-Medium Enterprises to undertake **retrofit** projects that are in sectors such as Building, Transportation, Industry, Waste, Agriculture, and more. The grant program covers up to 25% of expenses to a maximum of \$250K for projects that reduce energy usage, costs, and/or GHG emissions.

The [Annex A: how to complete an online application](#) provides tutorial videos to help walk you through the steps required to make a GCKey and navigate the Single Window Information Manager (SWIM) needed to fill out the online application.

The CAIF is funded from the [proceeds of the federal carbon pollution pricing system](#).

CANADAGAP 

CanadaGAP 2019 AGM and Town Hall Session will be held in Charlottetown

Starting in 2019, the [Annual General Meeting](#) for CanAgPlus, the not-for-profit corporation that owns and operates the CanadaGAP Program, will be held in different regions of the country to improve participation and facilitate engagement by members. The 2019 Annual General Meeting **will be held in Charlottetown, PEI on Thursday, November 28** at 2:00 p.m. ADT, at the [Red Shores Racetrack & Casino](#).

- A town hall interactive session with members in attendance is scheduled to follow the AGM.

- open discussion with CanadaGAP.
- Members are invited to join CanadaGAP for a holiday buffet dinner following the AGM, generously sponsored by [Syngenta](#). The dinner starts at 6:00 p.m. at the Top of the Park restaurant.

Attendees must register to attend the AGM and dinner by October 14.

Details on how to register and information on this event are [available on the CanadaGAP website](#).

Cavendish Farms announces new potato breeding and research facility will open in PEI in 2020

Cavendish Farms has announced that it will build a new potato research and plant breeding centre in New Annan, Prince Edward Island.

The \$6 million facility, which is fully funded by the company, is an investment in the sustainability of PEI's all-important potato industry, and will allow Cavendish Farms to conduct important research year-round. The plant will evaluate different lines of potatoes with promising traits such as superior yields and a reduced environmental footprint specific to soil, climatic and seasonal conditions on PEI.
