Subject: Correction Notice – Version 8.0 CanadaGAP Food Safety Manuals

REMARQUE IMPORTANTE : Cet avis de correction s'applique uniquement aux versions anglophones des Guides de salubrité des aliments CanadaGAP.

CORRECTION NOTICE

Please note that changes have been made to the CanadaGAP Food Safety Manuals Version 8.0 (2020). Updated copies of both the Fruit and Vegetable and Greenhouse manuals are now available on the website at www.canadagap.ca/manuals/downloads.

The changes relate to the flow of the manuals; **no changes have been made to the requirements**. There are three places (once within the Fruit and Vegetable manual and twice within the Greenhouse manual), where users were directed to proceed to an incorrect section of the manual. Due to this oversight, two important sections may have inadvertently been passed over (i.e., the ‘Other Materials’ and ‘Environmental Monitoring Programme’ sections). This oversight **only** occurs in the English versions of the CanadaGAP manuals.

The Fruit and Vegetable Manual has been corrected in the following place:

19.4 Application of Wax

FOR TREE AND VINE FRUIT, COMBINED VEGETABLES (EXCEPT FOR ASPARAGUS, SWEET CORN AND LEGUMES) ONLY (if not applicable proceed to Section 19.5 “Other Materials”/20- Storage of Product)

The Greenhouse Manual has been corrected in the following 2 places:

In Section 19.3 Packing/Repacking:

In the Packinghouse

- Packing/Repacking is done in the packinghouse, proceed below.
If not, proceed to Section 19.4: “Other Materials”/Section 20- Storage of Product.

In Section 19.4: “Other Materials”:

CanadaGAP® is a program developed in Canada to promote Good Agricultural Practices (GAPs) for fruit and vegetable suppliers.

19.4 “Other Materials” (see glossary definition)

- “Other materials” are used on the premises, *proceed below.*
If not, proceed to **Section 19.5: Environmental Monitoring Program (EMP)Section 20:
Storage of Product.**

Program participants should review both the ‘*Other Materials*’ and the ‘*Environmental Monitoring Program (EMP)*’ sections in their respective version of the manual to determine if these sections apply to their operation.

We thank you for your cooperation and apologize for any inconvenience this may have caused. Please contact info@canadagap.ca with any questions.

CanadaGAP® is a program developed in Canada to promote Good Agricultural Practices (GAPs) for fruit and vegetable suppliers.
